

Put your work in your pocket and go

Nintex Mobile allows you to do your job wherever your work takes you. Capture data. Submit requests. Complete tasks. Review content. Approve documents. Anywhere, anytime across Nintex Workflow and Nintex Forms.

Keep your processes moving securely while you're on the move, even when you're offline:

- **REAL TIME SYNCHRONIZATION**
- **NATIVE MOBILE EXPERIENCES**
- **YOUR PROCESS, YOUR APP**

The Nintex solution came in at a fraction of the cost of an off-the-shelf or custom solution, and it delivered immense and immediate value. We really couldn't have made a better choice.

– Clint Logue, Sr.
Geological Engineer,
BGC Engineering Inc.

REAL TIME SYNCHRONIZATION

Real-time synchronization ensures all changes to your workflows and forms show up immediately on your mobile device, so you can stay productive everywhere.

- Eliminate paper-based processes by capturing data directly on a mobile device
- Interact with business systems and processes when you're away from your desk
- Kick-off, track and delegate tasks from your mobile device

NATIVE MOBILE EXPERIENCES

Rendering forms in native apps ensures a familiar experience for users, delivering the right format for their device and platform.

- Feed photos, videos, and other data directly into your processes
- Add annotations or use the drawing tool to capture additional notes
- Enable non-technical users to make forms mobile with one click

YOUR PROCESS, YOUR APP

Mobilize your business processes with custom-branded mobile apps, streamlining the tasks users need to complete in the field.

- Use your logo and visual ID to build familiar-looking apps
- Design and publish key mobile line-of-business processes in just a few clicks
- Deploy apps via a simple and secure email process, without a mobile device management solution

NINTEX IN ACTION

Nintex makes it easy to automate your processes, so you can keep projects moving, but without all the manual work. Tackle everything from simple processes in a department to sophisticated, company-wide processes like:

- Document Compliance
- Contract Management
- Employee On-Boarding
- Asset Management and Tracking
- Field Service and Inspection
- Customer Support and much more
