

## Nintex® App Studio

Easily create custom, targeted, and powerful mobile process applications without writing a single line of code with Nintex® App Studio.

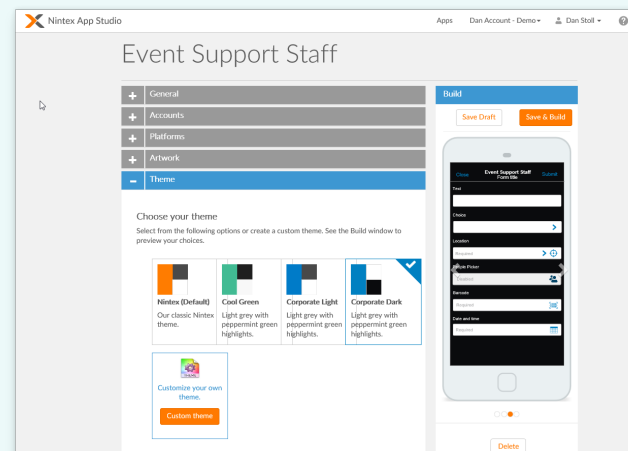

See how you can:

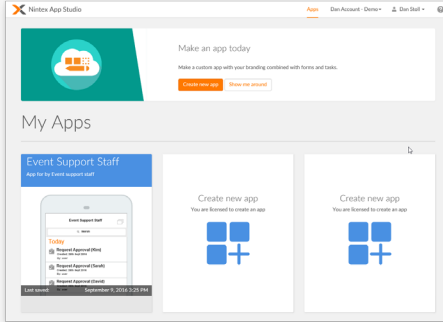

- Build and deploy focused mobile process applications across Nintex Workflow Cloud™, SharePoint on premises, and SharePoint Online.
- Customize apps by uploading your organization's branding, corporate logos, and color schemes.
- Easily deploy and refresh apps built with Nintex App Studio to users via a simple and secure over-the-air email process or with a variety of mobile device management (MDM) solutions.

## Save Development Resources and Drive Increased Process Engagement

With Nintex App Studio, build powerful mobile applications and drive increased process engagement more efficiently and cost effectively, compared to traditional custom mobile development.

- Add value to individual departments, such as digitizing a field safety inspection process for a maintenance crew.
- Streamline business functions shared by all, such as creating a meeting room request app that all employees can access anywhere.

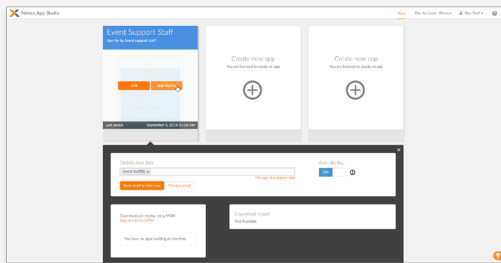

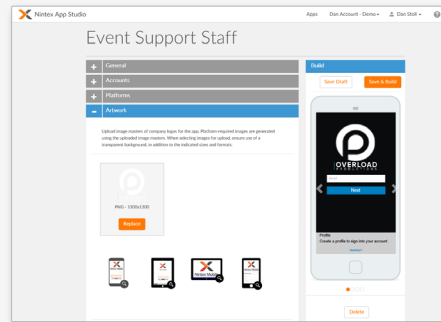

## Create Mobile Process Apps

Specify which forms and/or workflow tasks to be included in the app, providing the ability to build and deploy departmental or process-specific applications.

- Create line-of-business apps using the tools you are already familiar with (Nintex Workflow and Nintex Forms).
- Empower business users with a targeted, efficient, and relevant app on their device.

## Customize Apps with Your Organization's Branding

Apps are immediately recognizable by the use of an organization's existing branding and promotional images. Upload existing branding materials and preview in real time as the app is built.

## Easily Deploy and Refresh Apps

By distributing apps built with Nintex App Studio, you can:

- Reduce turnaround time between completing and deploying apps.
- Easily determine who should receive your app.
- Simplify the install process for your users.

## Deploy Your Apps Across All Major Mobile Platforms

Nintex App Studio hosts extensive resources in the cloud which are deployed on-demand to build apps for all major mobile platforms. This allows you to focus on creating powerful process apps across devices without having to maintain multiple build environments.

Build powerful mobile process applications for:

- iOS
- Android
- Windows Phone
- Windows 8+
